

# Snowman Ornament from Batting Scraps

You will need:

Scraps of batting- any kind

Heat n Bond Fusible Interfacing- Extra Firm

Fabric scraps and assorted embellishments such as ribbon, buttons, etc.

Twine or heavy thread to make the hanging loop

Fabric Fuse glue

Here's what you do:

Trace the snowman and hat patterns onto the dull side of the fusible interfacing. Cut out the interfacing, leaving a little bit of a border around the pattern shape.

Place the interfacing with the snowman design shiny side down on a scrap of batting. Fuse in place according to the package instructions.

Place the interfacing with the hat design shiny side down on the **WRONG** side of a scrap of fabric. Fuse in place according to the package instructions.

Cut out the snowman and hat on the lines.

Repeat using a tiny scrap of orange fabric for the nose. Cut out a triangle shape for the nose.

Cut a piece of twine for the hanging loop, fold in half and glue to the back of the hat. Embellish hat with ribbon if desired.

Glue hat, nose, and embellishments onto the snowman; allow to dry thoroughly.
